

The Carmon Group (CGI) recruits Greg Ellis as Director of Ops & Engineering for Cleveland Punch & Die Co.

News Release Date: November 8, 2011

CGI is pleased to announce that Greg Ellis has joined Cleveland Punch & Die Co. (www.clevelandpunch.com) as Director of Operations & Engineering. This is a newly created role, reporting to the president. Greg will be responsible for manufacturing operations, engineering, continuous improvement and product development.

Greg previously held senior leadership roles with Bemis Company, a \$3.5 billion flexible packing company and RMI Titanium, a \$350 million global leader in titanium metals. He has a proven track record in operations and engineering and holds an undergraduate degree from Youngstown State University and is a certified Master Black Belt.

About Cleveland Punch & Die Company: Cleveland Punch & Die Company recently celebrated 130 years in business, founded in 1880. They are a privately held corporation based in Ravenna, Ohio and manufacture steel punches, dies, shear blades and tool holders for customers across the Steel Fabricating Industry. Cleveland Punch & Die Company's business is founded on extreme customer service and their clients include end users across a wide variety of manufacturing industries, as well as, exclusive relationships with OEM's.

Chris Carmon and Sandy Stern were the search consultants managing this assignment. CGI is a retained search firm based in Cleveland, Ohio. We specialize in senior leadership roles in operations, engineering, business development and finance across a variety of industries.
